

Please retain the protection that the New Jersey Do Not Call List has afforded me. I can finally sit down on a Friday night and watch a movie all the way through without the constant interruptions of telemarketers. Should you choose to repeal or weaken this law, I feel that you will be doing a disservice to all New Jersey residents that have taken advantage of their individual ability to request that they not be solicited by telemarketers whose only motivation is profit, not the service they may or may not be providing the consumer.
